PUBLISHER'S PREFACE

This collection contains Solastro's most advanced and best work in the field of lottery prediction produced at the very end of his life bringing his life's work to its ultimate consummation. Solastro stated this system advanced his studies to the highest level possible, beyond all that can be accomplished with the pieces in our earlier volume, *Solastro's Key Lottery Forecasting Systems*.

This system, initially called *The Seven Keys to Lotto Success*, but later renamed, *My Winning Strategy for Lotto*, was made available in only 12 copies to his very closest clients at the price of \$2,000 each, back in 1993, which would be equivalent to almost \$4000 in today's dollars. The system itself is comprised of 7 'key' rules that are used to predict the lotto using astrological and other methodologies.

Solastro was known amongst his clients for having won 4 different lotteries back in the 1970's and 80's, each over \$30,000, and was just a hair's breadth away from winning the grand price in one of them. A friend of the Institute, who communicated with Solastro over 30 years, was given copies of the deposited checks for verification of these wins, which were also shared with other clients to verify the success he had with his systems.

Though many of the most famous astrologers and numerologists wrote works on Horse Racing, only very few every experimented with lottery prediction, due to the pure complexity of the process. In fact, the only other person we know of who forecasted and won lotteries is the great financial market analyst and forecaster, W. D. Gann. In his private Ephemeris, there are hand-written notations saying, "won lottery," and Lambert Gann, the current holder of the Gann collection, has a collection of large notebooks full of Gann's lottery research, including many 100's of pages of detailed calculations.

However, the lottery that Gann played back in his day, in the 1950's and before is not the same as the lottery that we have today. In Gann's day, one would purchase a ticket off a role with the number printed on it, more like in current raffles, so one could not choose the specific number like one would today. Generally, these were 4-digit numbers on those tickets, so Gann's lottery world would have more to do with finding the correct time to

purchase the ticket. This is not so with our current lottery system where the player either selects the numbers himself, or has the computer generate a random series of numbers.

So, again, history has left us with almost no resources or references by the great masters of astrology, numerology and prognostication on lottery forecasting. Many, like Sepharial or Butaney, wrote about Horse Racing and financial forecasting, but to our knowledge, nothing exists by these greats on lottery prediction, making these rare Solastro manuscripts an almost one-of-a-kind resource for this unexplored field.

We are fortunate to have preserved this rare system. We have included Solastro's own advertisement for this advanced system before the text to illustrate how exclusive this system is, and how few people have ever had access to it. Included with manuscript is a collection of hand-written letters between Solastro and a client discussing topics related to Solastro's work.

One final point that Solastro made to all of his clients was regarding the importance of donating 10% of all their winnings to charity. We strongly suggest that the reader continue follow this very important rule, which is closely connected to achieving long term success. This principle is based upon important Karmic elements which will best assure continued success in these endeavors if followed respectfully.

For those who feel inclined to explore similar methods of forecasting events like Horse Racing or 2-team or 2-player games, like Football or Tennis, we suggest you explore our other Solastro volumes, as we have other excellent collections in each of those fields.

Go to www.sacredscience.com for more information on Solastro's, and for the largest collection of works on astrology, numerology, racing, betting, lottery and financial market forecasting. We have many more works on these subjects by the greatest authors in the field.
